

# Water Remediation Technology Expands Production with New Facility

October 13, 2015

**Water Remediation Technology (WRT)** opened its new Media Production Facility in Golden, Colorado. The new facility provides expanded media production, processing and storage capabilities for WRT's proprietary treatment media products and OEM customers and business partners. This facility will allow WRT to fulfill the increasing demand for Z-88<sup>®</sup> Radium Removal Media and Z-92<sup>®</sup> Uranium Removal Media, develop and produce other proprietary treatment media, and continue to grow and develop OEM media production and processing business partnerships.

The environmentally friendly facility includes a comprehensive water treatment and recovery system, solar energy power, and other energy efficient design elements.
